VanIsle Networks offers local hosting and colocation services for clients who want a simpler, more personal alternative to large remote providers. We provide dependable connectivity, flexible service tiers, and the option to scale from basic hosting to a more managed support model.

All services below are starting-point packages and can be adjusted based on hardware, power requirements, support expectations, and network design.

## Basic Server Hosting

### Starting at \$50/month

A simple entry-level option for clients supplying their own hardware and managing their own systems.

#### Included

- Space for 1 customer-owned server
- Power connection
- Shared 1Gbps internet connectivity
- Shared public IP access
- Basic physical hosting at our facility

#### Notes

- Best suited to personal servers, lab systems, low-cost off-site hosting, and technically self-sufficient clients.
- This tier is designed as a straightforward hosting option and does not include backup power guarantees, managed support, or SLA commitments.

## Standard Colocation

### Starting at \$95/month

A stronger business-friendly option for clients who want better hosting conditions and light operational support.

#### Included

- Space for 1 customer-owned server
- Power connection
- Shared 1Gbps internet connectivity
- Public IP assignment

- Basic remote hands by appointment
- Cleaner business hosting environment

### **Notes**

- Well suited to small business servers, off-site replicas, and secondary infrastructure that benefits from local hosting.
- Optional upgrades such as additional IPs, reverse DNS support, scheduled reboots, monitoring, and VPN access can be quoted separately.

## **Managed Hosted Hardware**

### **Starting at \$149/month**

For clients who want Vanisle Networks involved beyond simple hosting, with monitoring and ongoing operational assistance.

### **Included**

- Space for 1 customer-owned server
- Power connection
- Shared 1Gbps internet connectivity
- Public IP assignment
- Basic monitoring
- Remote hands support
- Reboot assistance
- Maintenance and troubleshooting coordination

### **Notes**

- Best for business workloads and important off-site systems where responsiveness and local support matter.
- Additional services such as protected power, backup storage, managed backup jobs, OS update assistance, and expanded alerting are available as add-ons.

## **Protected Power Hosting**

### **Custom pricing**

For clients who want hosting backed by UPS and generator-supported infrastructure for more resilience.

### **Included**

- Protected power placement options
- UPS-backed hosting
- Generator-supported runtime
- Priority placement for critical systems
- Suitable for higher-value or more sensitive workloads

### **Notes**

- Quoted based on equipment, power draw, and service expectations.

## Available Add-On Services

<b>Network &amp; IP</b>	<b>Support &amp; Operations</b>
Additional public IPv4 addresses Reverse DNS / PTR support VLAN or segmented network options VPN access options	Scheduled remote hands On-site troubleshooting Hardware install assistance OS reload assistance Basic infrastructure consulting
<b>Backup &amp; Recovery</b>	<b>Managed Services</b>
Backup storage Off-site replication targets Backup job monitoring Disaster recovery planning	Monitoring and alerting Firmware and update assistance Security review and hardening Ongoing infrastructure support

## How We Quote

Final pricing depends on hardware type, physical size, power draw, IP requirements, support expectations, and whether the service is simple hosting or a more managed deployment.

If you have a specific project in mind, we can provide a direct quote based on your equipment and requirements.

## Contact

For hosting, colocation, or a custom infrastructure quote, contact VanIsle Networks at (250) 886-8296 or [a.english@vanislenet.ca](mailto:a.english@vanislenet.ca).

This guide is intended for customer reference. Pricing is subject to final review based on project requirements.
